If you ask anyone how was your day out fishing? It was bad but it was much better than a better day at work. The reason is, many guys and women usually go with some people whether is with friends, family, or work friends. We mostly like to spend time with them because no matter what you are going to at least have fun just spending time with them.

Many people like it when the drive up is calm listening to soft music and then when your out on the lake and it is calm and if your in the sun it feel uplifting and gives you relief from what your life might be at home.

I like spending time with the family and friends that you can have fun with and talk about funny times and jokes but the most fun or best part of it is spending time like me with my uncle, he is fun to be with and he will cheer you up even if some one just died he likes to make people feel good and being with him is awesome

When you're on the lake you will always end up think about work be usually it will be thinking about what you might be doing right now but the most is I am glad I'm not there right now but you have that thought most of the day.

It's quiet birds chirping and the sound of the small waves as they roll under the boat as you lay there soaking up the morning sun and hear a quiet sound of the CD player playing a soft or slow song. That would be just great if stress was on you at home but now that you are on the it is so calm and then you have that thought glad I am not at work havin' to deal with that comotion then as it happens you have to think what to do tomorrow and that is what a bad day of fishing is better than a good day at work.
